

BioVive

BioVive

ENERGY FOR YOUR CROPS AND ROOTS

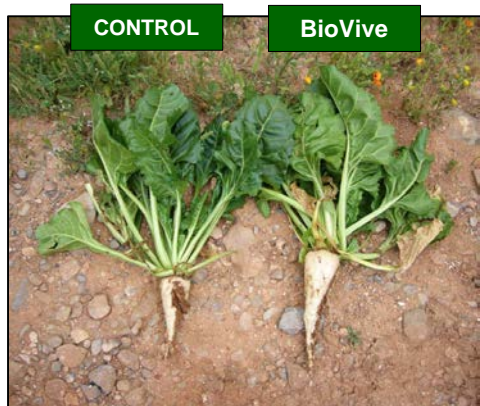

- ✓ Promotes root development and formation of root absorbent hairs.
- ✓ Increases number of secondary roots, thereby increasing volume of soil nutrient availability.
- ✓ Increases tolerance to stress conditions in Rhizosphere from salinity, oxygen deficiency, low soil temperatures.
- ✓ Fast and visible impact on plant health.

ENERGY FOR YOUR CROPS

BioVive is a 100% vegetable based amino acid obtained from fermenting vegetable protein and carbohydrates. **BioVive** has a well balanced aminogram that maximizes root development and promotes plant growth.

Rooting Power

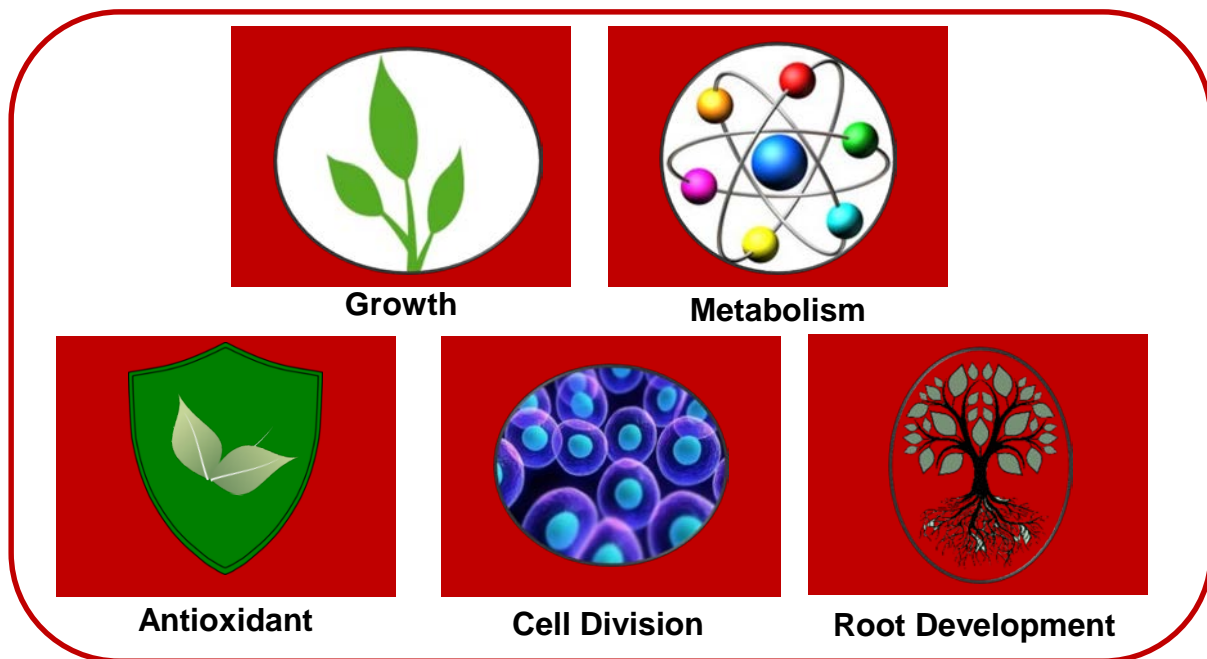

BioVive Effects on Beet Root

4 Key Amino Acids at work in BioVive	
Proline	Affects plant water relations by maintaining turgidity of cells under stress. Increases rate of photosynthesis.
Alanine	Essential for the synthesis of chlorophyll. Improve quality of fruits.
Arginine	Effective source of Nitrogen for root initiation. Induces synthesis of flower formation.
Leucine	Supports majority of plant metabolism functions.

MODE OF ACTION OF BioVive IN PLANTS

FEATURES AND BENEFITS

- ✓ **Source of Nutrient for Beneficial Bacteria.**
- ✓ **Source of Vitamins that Boost Plant Metabolism.**
- ✓ **Source of Organic Acids that Increase Phosphate Solubilization.**
- ✓ **Activates Cell Metabolism (Nitrogen and Carbon).**
